UX / UI Designer - Front-End specialist

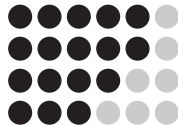

Following studies in web and graphic design, I oriented myself then to acquire a more global knowledge about user interface and user experience design, deepening my knowledge in HTML5, CSS3 and Javascript.

After working for almost 10 years as an employee, I then launched myself as a freelancer, which allowed me to collaborate with very interesting people on projects that were no less interesting, for big companies (Allianz, Etnic, FWB, Adeps) as well as for smaller structures.

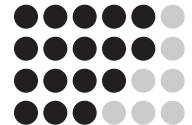

Since the beginning of my professional career, the efficiency and the user enjoyment are my main lines for every project, and it allows me today to understand, analyse and purpose complete and effective solutions in the UX and UI fields, alongside some coding and more traditional design skills.

SKILLS

User Interface Design
User Experience Design
Marketing Digital
Branding

Figma, Sketch, Miro
Adobe Suite, CSS
HTML, Javascript
Wordpress, SEO
